

0 - 12 Months

	Pragmatic language	Receptive Language	Expressive Language	Sound Production
0 - 3 Months	- Attends to eyes and mouth - Has preference for faces - Exhibits turntaking	- Recognizes familiar sounds - Responds to loud sounds	- Cooing - Different cries for different needs - Smiles when spoken to/sees you	The baby makes cooing sounds (e.g. 'oo', 'ee', 'ah'), turns towards sounds and gives eye contact when they hear an adult speaking or making sounds
3 - 6 Months	- Laughs while socializing - Maintains eye contact appropriately - Takes turns by vocalizing - Following gaze - Copies facial expression	- Looks toward sound - Attends to toys with sound and music	- Babbling sounds (p,b,m) - Laughs - Vocalizes pleasure/displeasure	
6 - 9 Months	- Calls to get attention - Demonstrates attachment - Shows self/acts coy to Peek-a-boo (first true communicative intent) - Reaches/points to request	- Enjoys routine predictive games (i.e. peek-a-boo) - Recognizes words from common items - Begins to respond to simple requests (i.e. "come here")	- Varied babbling - Uses speech/sounds to get attention - Imitates speech sounds - Produces first meaningful word	At 6 months the baby starts to babble and repeat sounds (e.g. 'mamama')
9 - 12 Months	- Directs others and participates in verbal routines - Repeats actions that elicit laughter - Restarts play and engages in interactive routines - Uses vocalizations and gestures to express needs, emotions, and responses - Communicates 2.5 times per minute during free play
